Product Information

CT 155 Premium Grade Paper Application Tape

Description:

Premium grade, heavily saturated white crepe paper with mid-range adhesion. Designed to aid the transfer and installation of small and large graphics, it protects graphics printed with UV screen print inks and clear coats. Its medium tack rubber adhesive is sepcially formulated to flow into the peaks and valleys of the textured surface of four color prints. Features improved adhesion to paper or film release liners. No adhesion build to store graphics. Extra-heavy weight facestock makes handling of large graphics easier. Heavier paper is also less likely to tear during removal. Removes easily from applied graphics. Adhesion adheres well to release liners for superior lay flat preventing tunneling and edge curling of stacked or rolled graphics.

Application:

- Protective premask for graphics printed with UV inks and clear coats.
- Excellent surface protection for stored screen printed graphics.

Technical Data

Adhesive	Rubber-Based
Substrate	Saturated Crepe Paper
Thickness *(mils)*	6
Adhesion to Steel *(oz/in of width)*	17 to 19 (1.9 to 2.1 N/10mm)
Tensile Strength *(lbs/in of width)*	19 (33.2 N/10mm)
Elongation *(% at Break)*	12
Tear Resistance	70 to 80

The data provided are nominal values based on PSTC, ASTM, and other standard tests. The data should not be considered specifications.
